# SNAPSHOT PROPERTY MATCHERS

The image displays a side-by-side comparison of code snippets, illustrating the 'before' and 'after' states of using Jest Snapshot property matchers. The window title is 'kanye.one.spec.js.snap — jest-sandbox'.

**Before (Left Panel):**

```
1  const user = {
2    id: Math.floor(Math.random() * 100),
3    createdAt: new Date(),
4    name: "Kanye"
5  };
6
7  test("full user object", () => {
8    expect(user).toMatchSnapshot({
9      id: expect.any(Number),
10     createdAt: expect.any(Date),
11   });
12 });
13
```

**After (Right Panel):**

**AFTER**

```
1  // Jest Snapshot v1, https://goo.gl/fbAQLP
2
3  exports[`full user object 1`] = `
4    Object {
5      "createdAt": Any<Date>,
6      "id": Any<Number>,
7      "name": "Kanye",
8    }
9  `;
10
```

# SNAPSHOT PROPERTY MATCHERS

does the same thing.

Blazing means good.
