SNAPSHOT PROPERTY MATCHERS

The image shows a code editor with two panes. The left pane, titled 'kanye.one.spec.js', contains the following code:

```
1 const user = {
2   id: 'some-id',
3   createdAt: Date.now(),
4   name: "Kanye"
5 };
6
7 test("full user object", () => {
8   expect(user).toMatchSnapshot({
9     id: expect.any(Number),
10    createdAt: expect.any(Date),
11  });
12 });
13
```

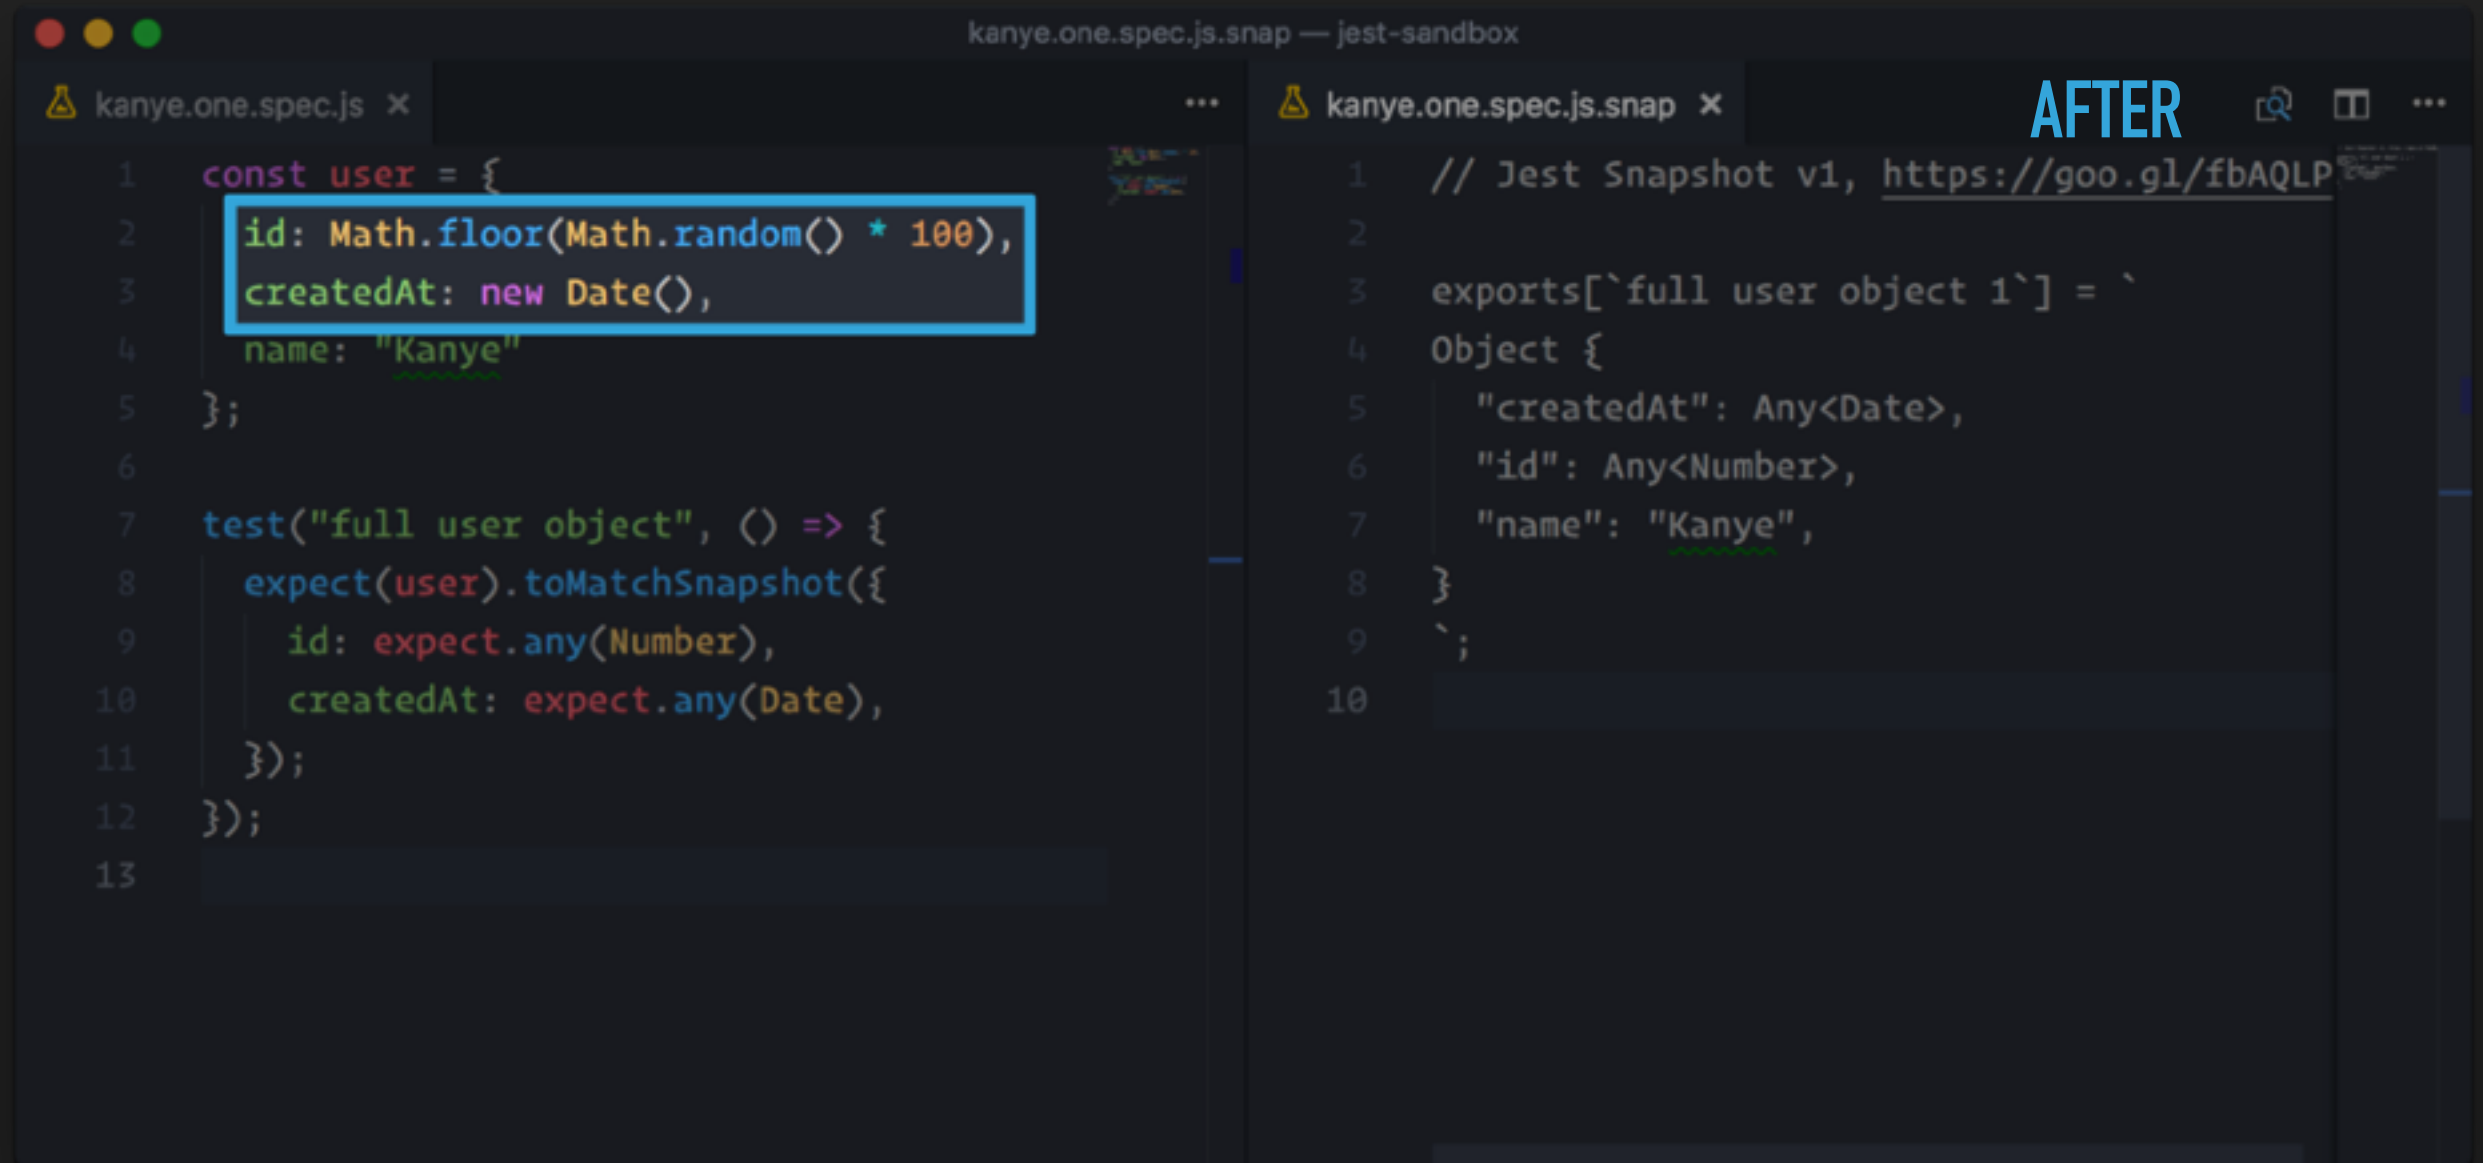

The right pane, titled 'kanye.one.spec.js.snap', shows the snapshot after the test. It contains the following code:

```
1 // Jest Snapshot v1, https://goo.gl/fbAQLP
2
3 exports[`full user object 1`] = `
4 Object {
5   "createdAt": Any<Date>,
6   "id": Any<Number>,
7   "name": "Kanye",
8 }
9 `;
10
```

A blue box highlights the 'id' and 'createdAt' properties in the source code on lines 2 and 3.
